## **NOTICE OF ALLOWABILITY**

### ***Status of the Claims***

This action is in response to papers filed 22 September 2005 in which claim 1 was amended and the previous rejections were traversed. The amendments have been thoroughly reviewed and entered.

The previous rejections in the Office Action dated 22 June 2005 under 35 U.S.C. 102(e) and obviousness double patenting over U.S. Patent No. 6,228,575 are withdrawn in view of the Applicant's comments on pages 6 and 9-10 of the response. The previous rejections under 35 U.S.C. 103(a) are withdrawn in view of the amendments and comments on page 7 of the response. The previous rejections under obviousness-type double patenting over co-pending application 10/229,319 are withdrawn in view of the fact that the conflicting claims in the '319 application have been canceled.

Applicant's comments and amendments place the claims in condition for allowance.

Claims 1-15 are in condition for allowance.

## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The claims are drawn to a method of target analysis. The method differs from the prior art in that the instant claims estimate the nucleotide sequence based on relative hybridization, then construct a subsequent array based on that estimation to reestimate the sequence, again based on relative hybridization. In a further embodiment as recited in instant claim 2, subsequent steps are performed until the reestimated sequence is constant between successive cycles. Hence, target analysis is based on relative hybridization, not sequence determination. In contrast, the prior art determines the nucleic acid sequence. Skiena uses algorithms to

design probes for subsequent hybridizations and sequence determination (Column 6). Other well-known techniques are used to determine sequences e.g. primer extension, Sanger sequencing and etc. However, the prior art does not teach or suggest the instantly claimed sequence estimation and reestimation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **Conclusion**

Claims 1-15 are allowed.
